Attaining gender justice is not an easy task in India. From time immemorial, a girl child has been considered as an unwanted entity and a burden whom the parents would not mind doing away with. Discrimination against women begins even before her birth. The gruesome evils of female feticide and infanticide prove how brutal the world could be to women.

Though the Indian constitution provides equal rights and privileges for men and women and makes equal provision to improve the status of women in society, majority of women are still unable to enjoy the rights and opportunities guaranteed to them.

Traditional value system, low level of literacy, more house hold responsibilities lack of awareness, non-availability of proper guidance, low mobility, lack of self confidence family discouragement and advanced science and technology are some of the factors responsible to create gender disparity in our society
